The Boxlok (The Valve Box Alignment Device) Submittal Sheet

- EMMA SALES' Boxlok instantly center the valve box over the operating nut
 - Snapping above the valve's bonnet / seal plate and below the operating nut
- Valve Disassembly is not required
- Prevents shifts during installation backfill or overtime from ground movement
- Suitable for nearly all buried valves accessible from the surface
- The Boxlok is white in color for better visibility from the surface
- All Boxloks are made from HDPE
- Once the Boxlok is installed it will last the life of the valve
- The Boxlok fits most valves using a traditional 5.25" Cast Iron Valve Boxes with an 8" ID bottom
 - or 6" PVC (SDR35) used as a riser
 - or 8" PVC(C900) used as a riser
- Ultra low cost solution to a high cost problem
- Non-load bearing design
- Boxloks are made in the USA
- BABA Compliant

U.S. PATENT NO.
7575018 AND 8430116
